

# Stop weeds with Mother Nature's seal of approval.

## PolyDegrade™ Weed Mat

The eco-friendly weed mat that will  
increase your yield, speed up harvesting  
and save on water and herbicides.

### Key benefits

- Our PolyDegrade™ weed mats are completely biodegraded by naturally occurring microorganisms in your soil.
- The raw materials used to create our weed mat are compostable to EN13432 standard and has passed OK Soil certification, as our polymer contains variable biobased content, as well as polyactid acid (PLA) and other additives.
- It is the eco-friendly way to suppress weeds, increase yields, speed up harvesting and save on water and herbicide consumption.
- Simply plough the PolyDegrade™ weed mats back into the ground along with the plant debris to save time and money.

Innovation every day

# PolyDegrade™ Weed Mat

## Innovation every day

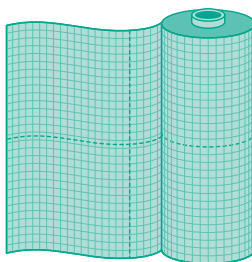

At EPL, it is our goal to become a leader in bioplastic. We want to deliver real change by creating innovations with complete product life cycle in mind including reusability, recyclability and degradability. We continue this legacy with

the PolyDegrade™ weed mats. PolyDegrade™ has been carefully designed to strike a balance between durability and degradability over time, making it the sustainable solution for weed mats.

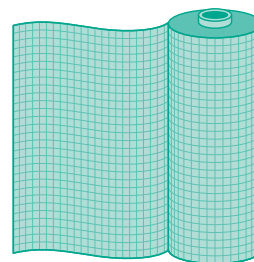

## Product specifications

480mm wide roll	Length
Perforated	50mm rolls
	100mm rolls
Unperforated	50mm rolls
	100mm rolls

Perforated

Unperforated
