

# PolyCycle™ Plant Protector Assembly Guide

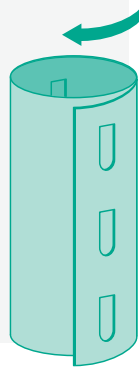

## Step 1

Unclip the handles and remove the PolyCycle™ Plant Protector.

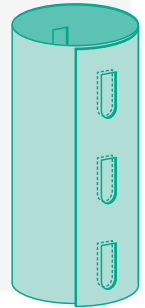

## Step 2

Roll up the PolyCycle™ Plant Protector to form a cylinder shape.

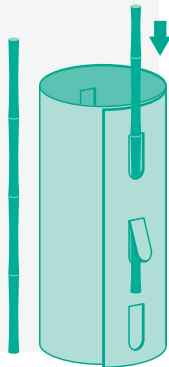

## Step 3

Ensure the tabs are aligned together.

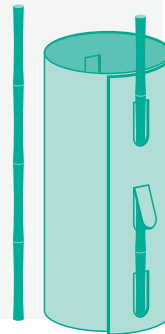

## Step 4

Thread the bamboo stake through the tabs ensuring it goes under and over.

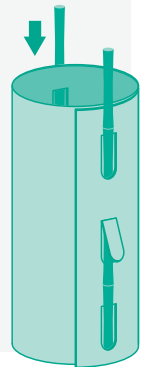

## Step 5

Ensure the bamboo stake goes all the way to the bottom.

## Step 6

Insert the optional second bamboo stake through the tabs on the opposite side.

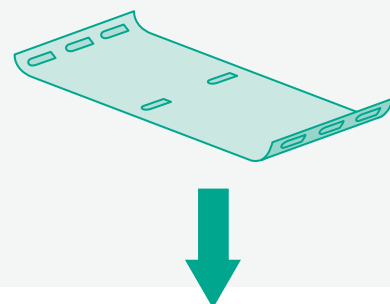

## Step 7

Your PolyCycle™ Plant Protector is ready to be placed over your plant. You can then tap the bamboo stakes into the ground.

## Step 8

At its end of use you can reuse your PolyCycle™ Plant Protector or recycle it. Check with your local recycling provider, or return to EPL where we will recycle them into new PolyCycle™ Plant Protectors.

At EPL we are committed to improving our product stewardship. That's why our PolyCycle™ Plant Protectors are manufactured from recycled and recyclable material to help minimise waste. To learn about our sustainable product range visit our website.
